

Leading Innovation

Motion Controller **XMC-E32A**

Productivity

High-speed program processing

Efficiency

Integration with variable EtherCAT devices

Convenience

IEC standard function blocks for motion control

Specialty

Special CNC features with G-Code supported

Fit for the Future of Smart Factory!
Innovation comes standard for the future of factory automation.

LSIS motion controller, XMC-E32A realizes the automation of smart manufacturing with easy, user-friendly and cost-effective engineering solutions, delivering high performance EtherCAT-based motion control functions and numerical control capabilities.

XGT Panel

XGT Servo System

Precision Planetary Gearbox
